MULTI-CLOUD ASSET COST OPTIMISATION PORTAL

NAME: P MANAS SIDDHARDHA

SRN: PES1UG24AM186

EPICS AND USER STORIES

Epic ID	Epic Name	Epic Priority	Story ID	User Story Title	User Story	Story Priority
MCACOP-1	Cloud Billing & Cost Management	High	MCACOP-6	Upload Cloud Billing Data	As a FinOps Analyst, I want to upload AWS, Azure, and GCP billing data so that cloud costs can be analyzed in one portal.	High
MCACOP-1	Cloud Billing & Cost Management	High	MCACOP-7	Categorize Cloud Costs	As a FinOps Analyst, I want cloud costs to be categorized by service and project so that I can understand where spending is occurring.	High
MCACOP-1	Cloud Billing & Cost Management	High	MCACOP-8	View Cloud Cost Dashboard	As a FinOps Analyst, I want to view a consolidated cloud cost dashboard so that I can monitor spending across cloud providers.	High
MCACOP-2	Idle Compute Detection	High	MCACOP-9	Detect Idle Compute Instances	As a FinOps Analyst, I want the system to identify idle compute instances so that unnecessary compute spending can be reduced.	High
MCACOP-3	Unattached Storage Optimization	High	MCACOP-10	Detect Unattached Storage Volumes	As a FinOps Analyst, I want the system to detect unattached storage volumes so that unused storage costs can be identified and optimized.	High
MCACOP-4	Budget Monitoring & Alerts	Medium	MCACOP-11	Set Budget Thresholds	As a Cloud Administrator, I want to define budget thresholds so that cloud spending can be monitored against planned limits.	Medium
MCACOP-4	Budget Monitoring & Alerts	Medium	MCACOP-12	Detect Budget Breaches	As a Cloud Administrator, I want the system to detect budget breaches so that excessive cloud spending can be identified promptly.	Medium
MCACOP-4	Budget Monitoring & Alerts	Medium	MCACOP-13	Send Budget Breach Alerts	As a Cloud Administrator, I want to receive alerts when a budget threshold is breached so that I can take corrective action quickly.	Medium
MCACOP-2	Idle Compute Detection	Medium	MCACOP-14	Estimate Idle Compute Savings	As a FinOps Analyst, I want to see estimated savings from idle compute instances so that I can prioritize optimization opportunities.	Medium
MCACOP-3	Unattached Storage Optimization	Medium	MCACOP-15	Estimate Storage Savings	As a FinOps Analyst, I want to see estimated savings from unattached storage so that I can prioritize storage cleanup.	Medium
MCACOP-2	Idle Compute Detection	Low	MCACOP-16	View Compute Optimization Recommendations	As a FinOps Analyst, I want optimization recommendations for idle compute resources so that I can decide which resources to right-size or remove.	Low
MCACOP-3	Unattached Storage Optimization	Low	MCACOP-17	View Storage Optimization Recommendations	As a FinOps Analyst, I want optimization recommendations for unattached storage so that I can decide which unused resources should be removed.	Low

Burndown Chart

How to read this chart

Date	Issue	Event Type	Event Detail	Story Points		
				Inc.	Dec.	Remaining
25/Aug/26 9:41 PM	MCACOP-10	Sprint start		3		
	MCACOP-6			5		
	MCACOP-7			3		
	MCACOP-8			5		
	MCACOP-9			5		
	Total					21
25/Aug/26 9:44 PM	MCACOP-6	Burndown	Issue completed		5	16
	MCACOP-7	Burndown	Issue completed		3	13
	MCACOP-8	Burndown	Issue completed		5	8
	MCACOP-9	Burndown	Issue completed		5	3
	MCACOP-10	Burndown	Issue completed		3	0
25/Aug/26 9:45 PM	MCACOP-10	Sprint ended by samikshajayanth8				0
	MCACOP-6					0
	MCACOP-7					0
	MCACOP-8					0
	MCACOP-9					0
	Total					0

BURNDOWN CHART FOR SPRINT 2

4.ANSWERS

1. Did your estimations reflect the actual effort?

My estimations were reasonably close to the actual effort. Most tasks were completed within their estimated story points, although some tasks required slightly more effort than expected. This helped me understand the importance of considering task complexity when estimating.

2. Was your backlog well-prioritized?

Yes, I prioritized the backlog based on the importance of the features. I focused on the core cloud cost management and optimization features first, followed by the less critical features.

3. How did your simulated sprint align with your plan?

My simulated sprints generally aligned with my original plan. I was able to organize the tasks into sprints and move them through the workflow from **To Do** → **In Progress** → **Done**. The simulation helped me understand how sprint planning works in practice.

4. What insights did the burndown chart give about your capacity?

The burndown chart showed how my remaining story points decreased during the sprint. Since I completed the tasks progressively, it gave me an idea of how much work I could realistically handle within a sprint and helped me understand the importance of maintaining a consistent pace.
